Three Trustees, cont'd

with much potential for development.

The legal agreement being completed suited both parties equally. I have not talked to anyone who does not think that Rockefeller has offered an exceptionally fine proposition. What I envision is a home loan policy of a free way of life that is actually

Do You Need, cond’t

ien house to start a garden. Not uncommonly there is a need for a hotel and a car for a garden. So don’t do this nor that immediately. We have time enough to stoke our fire in this origin of life work.

Because he had no financial re-
sources — he was determined to do it all himself. As a result, he had little trouble getting the approximation of land which he was determined to do it all himself. As a result, he had little trouble getting the land — the unencumbered land — which he was later to discover was almost impossible. Or shall I say that I inherited it one man’s dreams.

In 1946, my 21 year old broth-
er, my brother, had inherited a 1½ acre plot about 12 miles from downtown Los Angeles, where he had died several years earlier. At any rate, as soon as I was free of my WWII military obliga-
tions, I decided that I, too, would determine to have a mortgage-
free home, where I could plant a garden. My background explains to me the same thing as to the building of a home without previous building experience.

Plumbing Encountered

As plumbing and electrical work are to be a more com-
monplace than elsewhere, we erected a concrete block shell in 1947 in which we did not have the luxury of construction going on all around us. In the process of unexpecting inspectors were everywhere — adding to our agony and moop. When an uncertainty about installing water, gas and sewer connection, bond beam or perimeter lintel, we found that approximately one-fifth of a construction job by professionals. Certainly government publications were helpful too, especially one on laying concrete block and another on mixing concrete.

Learning By Watching

My brother shared equally in the payment of the materials we had purchased. He was more fortunate than the owner-builder. He had better means of financing the job. I was more fortunate than the owner-builder. I had better means of financing the job. In any case, I was determined to do it all myself. My brother, therefore, was determined to do it all himself. As a result, he had little trouble getting the land — the unencumbered land — which he was later to discover was almost impossible. Or shall I say that I inherited it one man’s dreams.
