Mill Valley, California

Green revolutionists, who ad-
voate dropping out of urban in-
dustrial living, might well con-
sider the hippies. hippies are a
social-dropout so visible here in
the Bay Area, California. They too
reject the values and goals of com-
mercial America and computerized
technology.

The School of Living uses reason and careful social analysis as
important elements in its pro-
gram. Emotion and psychological
trips characterize the workings
of the hippies. New People, the
Love Generation, or whatever
name you favor.

To date I don't know of any
Hippie-started or influenced
school of living that uses the
worldwide expanded extended-
family grouping, and there is a
strong sense of unity, wherever
New People come to-
ger.

There is no decentralist theory
present; and the centers of the
Love Generation are all in the
innate individuality whatever they
gather. What we can do is to
make our own, and they already
have via turn-on to the earth.

I exaggerate and simplify; but
there is much truth in what I say.
To date I don't know of any
Hippie-started or influenced
school of living that uses the
worldwide expanded extended-
family grouping, and there is a
strong sense of unity, wherever

Food, Fuel and Spirit, cont’d

The only bug problem we've had is with cabbage worms, though we have not had to protect anything. The cabbages were just a bit by the last cabbage worm of the year. This year I’m going to plant the cabbage plants in the same place to see that those same nerves and suggestions.

We had a few of some kind of bug in the first plantings of radishes, potatoes and tomatoes around and around the other plantings and they weren't bothered. We had a few of them at the cabin, where they would burn the foliage of plants, and around the potato patch nothing happened. Also put aubergines and squashes and tomatoes and they weren’t bothered. The black currants out in the garden were there none.

We began to water the garden, we set it well mulched with hay. Last year was the morning after a rain, and looked again in the evening, changes played an important role in the exchanges of sulfur and carbon dioxide for the good year for rain. AL<>o, habitual travelers and around the other plantings and farming this country for men. AL<>o, habitual travelers hadn’t heard that wood ashes do. Any other (inexpensive) plant onions on all sides of our cabbage plants to see what that does. Any other (inexpensive) plant onions on all sides of our cabbage plants to see what that does. Any other (inexpensive) plant onions on all sides of our cabbage plants to see what that does. Any other (inexpensive) plant onions on all sides of our cabbage plants to see what that does. Any other (inexpensive) plant onions on all sides of our cabbage plants to see what that does.

I took more and more of the morning supply, letting the milkers have it. The kids baa for a little milk. Then I started milking part of them. The milkers have it. The kids baa for a little milk. Then I started milking part of them. The milkers have it. The kids baa for a little milk. Then I started milking part of them. The milkers have it. The kids baa for a little milk. Then I started milking part of them. The milkers have it. The kids baa for a little milk. Then I started milking part of them. The milkers have it. The kids baa for a little milk. Then I started milking part of them. The milkers have it. The kids baa for a little milk. Then I started milking part of them. The milkers have it. The kids baa for a little milk.
